AutoCAD For Windows [Latest]

In November 2017, AutoCAD was the most popular software application, with 7.4% market share. It was followed by Microsoft Office with 6.1%, Excel with 5.6%, Adobe Photoshop with 4.8%, and 1.8% was shared by Google Chrome and Evernote. History AutoCAD is a derivative of the EGS-2 drafting system developed by Armin Günther and Albert Geiser in West Germany in the early 1970s. Günther and Geiser founded Dassault Systemes in 1972. The original AutoCAD drawing program was written in EGS-2 programming language. The EGS-2 system was one of the first engineering workstations with text, graphics, and a pointing device, such as a mouse. AutoCAD is not a "clone" of EGS-2, but a derivative of it. AutoCAD was first released in December 1982 for the Hewlett-Packard HP-1000 family of workstations, the 5100P and 5100S. AutoCAD was the first software product from Dassault Systemes available for the PC market. A new version, AutoCAD 2, was introduced in 1984. AutoCAD 3.0 was the first version to be available for use on the IBM PC, followed by Microsoft Windows versions. AutoCAD 3.5 was introduced in May 1988. On April 23, 1986, AutoCAD was released for the Apple Macintosh, using a Macintosh program development environment called Macintosh Technical Computing Environment (MTCE). The first release, AutoCAD 1.1, was compatible with the Apple II, and was available for both Mac and PC platforms, but only for the System II architecture. The Apple II version was also the first version to be integrated with the SketchUp CAD modeling program. However, the Mac version of AutoCAD became the standard version, with the PC version being discontinued. AutoCAD 2.5 was introduced for the Apple II on July 9, 1987. The first Windows version of AutoCAD was AutoCAD 2.5.1. AutoCAD 2.5.1 was the last version for the Apple II and Apple Macintosh platforms. AutoCAD 3.0 for the Apple II, Macintosh and Windows platforms was released in August 1988, with Windows compatibility. AutoCAD 3.5 was introduced in May 1988 for the Macintosh platform and in August 1989 for
