Dive Log Software Activation Key PC/Windows Latest

Art Loomis Academy of Dive Log Software was developed to provide a complete dive log software solution for the modern underwater photographer. Its designed for the scuba diving industry and is available for both Windows and Macintosh platforms. This dive log software runs on the Windows and Macintosh platforms. The result is a simple but complete dive log application, featuring tables, check boxes, custom fields, databases, records and much more. The Dive Log Software is also ideal for dive

club or dive shop use. In addition to the dive logs, the software also has several print forms that can be used for record keeping. Dive Log Software Crack Free (Updated 2022)

- Keep your dives all in one place. - Easy to use - Easy to upload. - Create new record, edit current record and view them. - Identify a dive quickly, by it's name and description. - Lots of functions and features. Requirements: - You need access to an Access database. - You can have it on your desktop or a server. Installation: 1) The first time you run the application it will prompt you to create an account. If this is the first time you run it, you will be prompted to select a folder to save the

database. 2) Click "Open Folder" to locate the database. 3) Copy the database file to your server. 4) Open the app and set the database server name, username and password. 5) Click "Start" to run the program. 6) That's it. This is a Trial version. Reviews: PC Games: Mobile Phones: RSS Feed: Comments: I created this application to make my diving experiences a little more organized. There is some other applications on the market that do the same thing, but these applications just couldn't compare. I hope

you find this application useful and would be interested to hear your comments and suggestions. Feedback: Donation: If you like this application and would like to donate to me so that I can keep making other cool software, then please consider making a donation using PayPal. First of all I would like to apologize to the subscribers. I was in a car accident on Wednesday, and I have been sleeping ever since. I have been in some pain and haven't been able to do much, but I have managed to get some videos up and answered some questions. If

you have any more questions, leave them in the comments, or if you like this episode, please subscribe to the channel. Check out my friends videos here: 77a5ca646e

Dive Log Software Crack

What's New in the?

Dive Log is a simple, useful, free, Windows 32 or 64bit application. It records and keeps track of your dives in an Access database, it allows you to select from a number of features to record the data and allows you to print it out. The database consists of three tables: Summary: the main summary table Equipment: the equipment used by you on the dive (speedos, BCD's, fins and masks) Dive Notes: the notes of what you did during the dive. The main features: Diving, Scuba diving, Snorkeling,

Fishing, Canoeing, Bubble Free Scuba diving, Air top diving The following sections show more details. Scuba diving: At the moment, you can enter the depth, time and distance for the divers and the equipment used. This allows you to enter the records of all dives. You can either choose to record the information for each diver or as separate dives. In this later case, you must enter the name of the divers and the equipment used. Canoeing: You enter the location, duration and depth of the canoe, the kit used and the equipment used.

This allows you to enter the records of all canoe dives. Fishing: You enter the location, duration and depth of the canoe and the kit used. Snorkeling: You enter the location, duration and depth of the canoe and the kit used. Air top diving: You enter the depth and time of the top. Equipment: You enter the equipment you used. You can either add the equipment or add the equipment used. Printing: You can either print all the dives of all divers at once or you can select the divers and the dives and print it out. You can print to Excel or

access report. Update: You can change the features you can record in the database or you can update the current database with the new data. Demo: You can view the database and its features, you can also play with the database. Notes: You can enter the notes for each dive. Debug: You can see the code of the program. Version 0.1 (2012-11-26) Add French, German and Swedish language translations. Add Scuba diving support for equipment used. Bug fixes. Version 0.3 (2013-11-05) Bug fix on GPS module initialization. Version 0.4

(2013-11-06) Bug fix on GPS module initialization. New option to select a date for date of dives. New option to select a date for date of equipment changes. Bug fixes. Version 0.5 (2014-01-01) New color icons for the
