Therefore, the data recording/reproducing apparatus of the key input type is convenient for users. For this reason, the data recording/reproducing apparatus of the key input type is widely used in the field of a CD-ROM, a DVD or the like. In the data recording/reproducing apparatus of the key input type, the push button is generally pressed by a user's finger. Therefore, since the push button is made of a conductive member such as a rubber or a plastics material, when the user's finger is pressed on the push button, static electricity is generated on the surface of the conductive member.
