

OnCourse Free

onCourse is an application designed to help you manage all aspects of your college, including enrollments, courses and tutors' payments, all from the same location and without too much effort. Quick setup and clean, intuitive look First off, you should know that you need to install the server and service before you can use the program. Since the app relies on a database, you need to access the server first and enter your credential to establish the connection. Even though it may take a bit longer, the installation is straightforward and should not give you any trouble. Upon launch, you are welcomed by a splash screen that consists of five sections, each with their specific extra features or functions. Therefore, you can access the course setup, customer service, accounts, marketing or the Dashboard, a tab that enables you to get a summary of the enrollments and revenues made over the past period. On a side note, you should know that the application comes with extensive documentation, so do not hesitate to access the help content in case you cannot find or do not know how to configure certain features. Provides you with tools to make student enrollment easier Granted, the idea behind the app is to supply you with a user-friendly environment where you can build a comprehensive database with all relevant information associated with your educational facility. Besides managing the database, the tool enables you to preview your data organized as reports that make sense to you. Moreover, considering that students enrollments are the primary source of revenue, the program comes with numerous functions that allow you to create incentives. To put it simply, you can easily create and manage discounts, memberships, vouchers as well as corporate passes, In addition, you can add and manage all sorts of products – t-shirts, mugs, textbooks, etc. - that your college is selling. A feature-rich app that could help with college administration All in all, onCourse comes with numerous options and functions that allow you to store and analyze all relevant data about your college or school so that you can take better business decisions in the long run. 2018 onCourse Review and Ratings First off, I have to say that the onCourse developer team has done an awesome job. The software is organized, easy to navigate and straightforward to use, even for the layman like myself. The software is clean, easy to use, and easy to implement into the client's work flow. With onCourse you will be able to pull all the information you need for your

Keymacro is a powerful text macro application. When you find any typo or grammatical errors in your documents, you can use Keymacro to automatically replace the keywords with correct words. Q: how to use setxkbmap on a real machine
I installed ubuntu 11.10 on my friends computer. He is using a keyboard that works perfectly with other OSs but the default X keyboard is not set to it. I am able to set his xkbmap -print to en_us. He tried to set it with setxkbmap -model evdev -layout us but it didn't work. How can I set this keyboard on Ubuntu?
A: From the X11 Users Guide, which is installed
