Cyclone Multimedia Co., Ltd. (hereinafter called "Cyclone") Bursting with a sense of pride over the opening of its world-wide VR-MMORPG, Cyclone .Net Lineage 2, presents and unveils its third new action game - Cyclone.Net Nail One Nine ( hereinafter "Nail One Nine"). Since the release of CYBIRD GUN&Hack, an action game that blended the two genres of swords and gun, the game can be considered to be one of those that have been proposed as a cross- over game between traditional games and VR-MMORPGs. It is a sword action game where the player can perform both sword fight scenes and gun fight scenes as a member of the Gun- and-Sword Brigade of the Gun&Hack world. The gun fight scenes in Nail One Nine are one after another. Therefore, the player can wander around a vast world. The only restriction for the moving range of the player is that the player can only avoid gun-fight bosses. In order to move around the world, you have to equip guns and swords. The gun you use depends on the story of the game, while the swords and guns that you use depend on your abilities. The ability to use swords and guns depends on the player level, which is determined by experience points (hereinafter called "EP"). You can thus advance into more powerful battles as you play. This is a game in which the player not only fights but also progresses at the same time. \*In CYBIRD GUN&Hack, the player uses guns and swords to defeat the enemies, but in Nail One Nine, the player will fight using guns and swords in order to defeat the enemies. Cyclone.Net Lineage 2 is a completely new sword-type action game. Nail One Nine is a game where the action of sword fights and gun fights is developed in perfect harmony. CYBIRD GUN&Hack is an action game that blends the two genres of swords and guns. CYBIRD GUN&Hack focuses on the utility of swords and

---

guns. CYBIRD GUN&Hack has about 20 different sword types and about 17 different types of guns. So, we could regard CYBIRD GUN&Hack as a new type of sword action game or a new type of gun action game. But, as

### **VRandish Features Key:**

- Play VRandish Puzzle on your desk
- Switch between the game to change backgrounds, move the camera for different point of view
- Detect collisions to stop your gaming

### **VRandish**

The purpose of VRandish ( Virtual Reality –The arena of anime), which is a military simulation, is to develop humans' army into a strong one. The game runs on that purpose, through battles between vampires and humans, in which these characters show their abilities. The game's world is made by many stages, each of which is composed of a variety of dungeons. The entire game has some 10 dungeons, and thus, there is a goal to clear all dungeons. The world is accompanied with a VR system, which is expected to be more comfortable to the audience, and it can provide many virtual game environments, such as the scenario that has been prepared for VR Games. We are planning on releasing the full version of VRandish as soon as possible. Stay tuned! We're happy to announce that we have released the first beta version of VRandish! There are only four dungeons in the beta version, but we're aiming at releasing the full version soon. You can

## What's new:

nikov\_2010] we note that  $U_t = U_s^* U_s \in G_{\{t,s\}}$  is invertible by the continuity of the projection  $U_s^*$  in the strong  $\mathcal{N}$ -norm topology since the strong  $\mathcal{N}$ -norm closure of  $U_s \subset \overline{U}_s$  is  $G_{\{t,s\}}$ .

[Cor:uniqueness\\_semigroups\\_continuously\\_associating] Let  $\mathbf{U}$  and  $\mathbf{W}$  be conjugations by semigroups  $U_t$  and  $W_t$  in  $\mathcal{N}$ , respectively, such that  $\mathbf{U}$  and  $\mathbf{W}$  continuously associate (see Def. [Def:relatively\\_commutant-cocycle]). If  $\mathbf{U}$  satisfies the cocycle property, then  $\mathbf{U}$  is unitarily equivalent to  $\mathbf{W}$ . We only note that  $\mathbf{U} \cong \mathbf{W}$  if and only if  $U_t = \alpha_t(U)$  and  $W_t = \alpha_t(W)$  for some strongly continuous representation  $\alpha: G \rightarrow \mathcal{U}(\mathcal{N})$  satisfying (cf. [vMorris\\_cocycles\\_theorem\\_of\\_Haag-Ruelle\\_eqs\\_controlled\\_evolution] Thm. A)

$$\begin{aligned} & \alpha_s(U) = \alpha_t(U) \quad \text{and} \quad \alpha_s(W) = \alpha_t(W), \quad s \leq t, \\ & \alpha_r \bigl( U_s U_t \bigr) = U_r \alpha_s(U_t) \quad \text{and} \quad \alpha_r \bigl( W_s W_t \bigr) = W_r \alpha_s(W_t), \\ & \alpha_r \alpha_s(U) = \alpha_t(U_r) U_s \quad \text{and} \quad \alpha_r \alpha_s(W) = \alpha_t(W_r) W_s \end{aligned}$$
