## GeoIP For PC [Latest]

GeoIP Crack is a small Windows application designed specifically for helping you find you the country of your website visitors based on a user-defined IP address. Minimalistic looks The tool implements an intuitive behavior that allows you to configure most of the dedicated parameters with minimal effort. Everything is kept as basic as possible, so there's support for only a few functions. Main features GeoIP gives you the possibility to type in the IP address directly into the main panel or paste the information from the clipboard. As soon as you enter the desired IP address, the program automatically displays the corresponding country. Performance Since it doesn't require much computer knowledge to set up the dedicated parameters, even less experienced users can learn to master the entire process in no time. Tests have shown that the application carries out a task quickly and without errors. It leaves a minimal footprint on system resources, so the overall performance of the computer is not affected. Where it falls short On the downside, there's no support for advanced features. You cannot query multiple IP addresses at the same time, upload the

---

information from a plain text file, check out extra details about the IP addresses (e.g. country code, continent), export data to plain text or XLS file format, copy the results to the clipboard, and locate the current IP address on a map using an online provider. Bottom line All in all, GeoIP proves to be a simplistic piece of software that comes bundled with limited features for helping you find out geographical info about custom IP addresses. User(s): 3View License: Freeware FAQ: Question: Is there a review system? Answer: The beta phase has ended. The first version will be released in a couple of days. Enjoy your beta-version and give me your feedback: Question: Where can I download the Free Version? Answer: Beta Test Finished: Download Link This eases the development process and makes it easier to get feedback. Question: How to contact you? Answer: Write me on my mail adress: Geodip@betatype.com Question: The Software features an Uninstall-programme? Answer: You can remove all the files your GeoIP has created with this simple and fast process. The GeoIP files are located in the folder C:\Program Files\AdzDip\Uninstall\ Question: How to install the Software on Linux? Answer: Tested with Debian,

## **GeoIP Crack + X64 [Updated]**

GeoIP enables you to find out details about a user's geographical location using an IP address. The Windows application is dedicated to helping you trace the geographical location of the user's computer. Use it in order to fetch data about a number of IP addresses at the same time. GeoIP is also small enough to fit on a standard Desktop icon, so it's not too large or too small for use. Features: A piece of software that's small enough to fit on a Desktop icon. Provides the possibility to type an IP address directly into the program. Allows to paste data from the clipboard. Geographic information can be retrieved about different IP addresses. Check out the country code, continent and country names. Find out the exact location of the IP address on a map. Thanks to the tool, you're able to know the IP addresses of other users. Support for languages like English, German, French, Spanish, Italian, Polish, Finnish and Turkish. AddIPAddress is a handy extension for a browser that enables you to add IP addresses to your favorite websites, blogs and forums. Main features With AddIPAddress, you don't have to copy the IP address and paste it in order to add it to one of the opened website or

---

forum. The browser extension automatically recognizes IP addresses, so the sites will save you some additional efforts. Read the hosts file The program also enables you to add IP addresses to your hosts file, which makes it easier to trace an IP address across multiple computers. Supports multiple languages The tool is available in all major languages that are used on the web. Option to use the proxy server You can enable the program to use a proxy server in order to help you identify a visitor's real IP address, so you'll only be able to know the real IP address of the user from the proxy server's logs. Bottom line AddIPAddress is a handy extension for adding IP addresses to your favorite websites, blogs and forums. DDosScout is a reliable and lightweight security tool that enables you to check the online safety of a desired URL. Main features In order to quickly see whether the URL you're interested in is safe, you can save it in a bookmarks file, in order to be able to check whether it's going to open in a safe web browser.

### **What's New in the GeoIP?**

GeoIP is a small Windows application designed specifically for helping you find you the country of your website visitors

## System Requirements For GeolP:

Recommended: Our New Demo is available on STEAM. Grab it and try it out for yourself. We would like to thank all of you for the support you have been providing us during our Kickstarter campaign, and for keeping us funded since then! We would also like to give a huge thank you to the moderators of our forums, for all of the work they have been doing to help us with the Project. Without them, we would not be where we are today. Since the last time we have released a demo, we have done a lot of improvements
